Website: www.ChalkBluffWaterSupply.com

Email: ChalkBluffWater@hotmail.com

Monday – Friday 8:00 AM – 12:00 PM & 1:00 PM – 5:00 PM

After Hours Emergency: 254-799-1268

McLennan County Sheriff: 254-757-5222 (non emergency)

Volunteer Fire Department: 254-548-8577

All water bills are usually mailed by the first of each month and the **payment is due upon receipt**. If you do not receive a water bill by the **5th of the month**, you need to call the office to verify the amount due. The water office mails all bills at the same time under our postal permit and cannot be responsible for the postal service delivery. **If the 15th falls on a weekend or holiday, the water bill is due in the office the Friday before by 5:00 PM or by 12:00 AM online to avoid a late penalty**. Payments must be received in our office before 5:00 PM on the 15th to avoid incurring the late charge; late charges will not be waived. If you mail your payment, and the water system received the payment after the 15th a late charge will be added to your account. (If the payment is received in our office after the 15th by US mail and is postmarked by the 15th the late charge will be removed). If you mail your payment and the water office never receives your payment, a late charge will be added to your account after the 15th. (We cannot be responsible for the US Postal Delivery).

Late Payment Fee: Once per billing cycle, a penalty of \$15.00 shall be applied to delinquent bills. This late payment penalty shall be applied to any unpaid balance during the current billing period.

Reconnect Fee: If the bill is not paid by the 15th, within 10 days of that date, your service can be disconnected. The Corporation shall charge a fee of \$35.00 during office hours (Monday-Friday 8:00 AM to 12:00 PM and 1:00 PM to 5:00 PM) and on holidays, weekends or after hours a fee of \$55.00 will be charged for reconnecting service after the Corporation has previously disconnected the services for reason provided for in the Tariff, except for activation of service under Section E.38 (Re-Service).

Returned Check Fee: In the event a check, draft or any other instrument is given by a person, firm, corporation or partnership to the corporation for payment of services provided for in the Tariff, and the instrument is returned by the bank or other similar institution as insufficient or non-negotiable for any reason, the account for which the instrument was issued shall be assessed a return check charge of \$25.00.

Current payment Options:

1. **Credit or Debit Card Payment by phone:** 1-888-291-2051 (24 hours a day/7 days a week)
A \$2.50 fee is charged for payments up to \$400.00 and a % after that.
2. **Online Credit or Debit Card Payment or E Check:** www.ChalkBluffWaterSupply.com
(<https://new.nexbillpay.net/cbwsctx/BillPay/SignIn>) (24 hours a day/7 days a week)
A \$2.50 fee is charged for payments up to \$400.00 and a % after that.
3. **Automatic Bank Draft Program thru the office:** Customer's Bank Account will be drafted around the 10th of each month for the amount of the bill. Customer will receive a bill each month with a note notifying customer that the account will be drafted. Signup at the office is free or charge.
4. **Drive Thru Window:** Check, Cash or Credit/Debit Card during regular business hours.
A \$2.50 fee is charged for Credit/Debit Card payments up to \$400.00 and % after that.
5. **Mail:** Check or Money Order thru US Postal Service. No late fee if post marked by the 15th.

All fees collected for credit, debit cards or e checks are collected by a third party agency not the water system.

These payment options should help our customers with the payment process and make your payment needs easier and help avoid a late charge or possible termination of service.

ISSUES THAT NEED OUR ATTENTION:
VERY IMPRTANT!

What has always been in the Tariff that governs CBWSC and regulation with the TCEQ and the PUC states: **THERE CAN BE ONLY ONE HOUSE SERVICED BY A WATER METER.** If you have more than one house/residence tied to one water meter, you are in violation of this regulation and could lose your water meter service. If you have a garage apartment or guest house, you must make an application for another water meter for this residence and run a separate water line from the new meter service to the residence to remain in compliance with our CBWSC Tariff and TCEQ, PUC regulations.

The CBWSC has always had a Cross Connection and Back Flow Program in effect, but new regulations have been implemented to educate consumers and protect the water system from possible unpotable water entering the water system. Two main areas of concern are outside sprinkler systems in your yard and rainwater harvesting systems. **If you have an aerobic septic system and an outside irrigation (installed after January 2009),** you will need a testable RP check valve installed and checked by a licensed Irrigator or Plumber that has a TCEQ approved Back Flow Prevention Assembly Testing License (BPAT). After installed and tested, the report must be sent to the water supply and the valve must then be tested annually and the report sent to the water office. If you have a **rainwater collection system** tied to your water line, you are required by law to have an RP check valve installed at the water meter and tested as above on installation and annually and the report sent to the water office.

Current monthly rates for each Residential and Water Conservation rates are as follows:

<u>Residential Meters</u>	<u>Charges</u>
Access Fee	\$27.00
O to 10,000 Gallons	\$ 2.75 PER 1,000 Gallons
Over 10,000 Gallons	\$ 3.75 PER 1,000 Gallons

Water Conservation Rate - Approved 2003

20,000 to 50,000 Gallons	\$ 6.00 PER 1,000 Gallons
Over 50,000 Gallons	\$ 8.00 PER 1,000 Gallons

Larger meters needed for commercial use will be determined by Chalk Bluff Water Supply Corporation's assigned engineer and Chalk Bluff Water Supply Corporations board of directors at the time of application to determine rates, size, feasibility, and availability of water service that will be needed. Commercial meter rates are for commercial users only (office building, service stations, etc.) and not for residential use.

If you have any questions, please feel free to call or come by the office.

Thank you,

Barry Hand

AGREEMENT made this _____ day of _____, _____, between

Chalk Bluff Water Supply Corporation,

a corporation organized under the laws of the State of Texas (hereinafter called the Corporation)
and

_____ (hereinafter called the Applicant
and/or Member),

Witnesseth:

The Corporation shall sell and deliver water and/or wastewater service to the Applicant and the Applicant shall purchase, receive, and/or reserve service from the Corporation in accordance with the bylaws and tariff of the Corporation as amended from time to time by the Board of Directors of the Corporation. Upon compliance with said policies, including payment of a Membership Fee, the Applicant qualifies for Membership as a new applicant or continued Membership as a transferee and thereby may hereinafter be called a Member.

The Member shall pay the Corporation for service hereunder as determined by the Corporation's tariff and upon the terms and conditions set forth therein. The Applicant may request a copy of the Corporation's tariff. A copy of this agreement shall be executed before service will be provided to the Applicant.

The Board of Directors shall have the authority to discontinue service and cancel the Membership of any Member not complying with any policy or not paying any utility fees or charges as required by the Corporation's published rates, fees, and conditions of service. At any time service is discontinued, terminated or suspended, the Corporation shall not re-establish service unless it has a current, signed copy of this agreement, and the member/applicant has complied with all terms and conditions that caused the service discontinuance.

If this agreement is completed for the purpose of assigning utility service as a part of a rural domestic water and/or wastewater system loan project contemplated with the Rural Development, an Applicant shall pay an Indication of Interest Fee in lieu of a Membership Fee for the purposes of determining:

- a. The number of taps to be considered in the design and
- b. The number of potential ratepayers considered in determining the financial feasibility of constructing
 - 1) a new water system or
 - 2) expanding the facilities of an existing water system.

The Applicant hereby agrees to obtain, utilize, and/or reserve service as soon as it is available. Applicant, upon qualification for service under the terms of the Corporation's policies, shall further qualify as a Member and the Indication of Interest Fee shall then be converted by the Corporation to a Membership Fee. Applicant further agrees to pay, upon becoming a Member, the monthly charges for such service as prescribed in the Corporation's tariff. Any breach of this agreement shall give cause for the Corporation to liquidate, as damages, the fees previously paid as an indication of interest. In addition to any Indication of Interest Fees forfeited, the Corporation may assess a lump sum of \$300.00 as liquidated damages to defray any losses incurred by the Corporation. If delivery of service to said location is deemed infeasible by the Corporation as a part of this project, the Applicant shall be denied Membership in the Corporation and the Indication of Interest Fee, less expenses, shall be refunded. The Applicant may re-apply for service at a later date under the terms and conditions of the Corporation's policies. For the purposes of this agreement, an Indication of Interest Fee shall be of an amount equal to the Corporation's Membership Fees.

All water shall be metered by meters to be furnished and installed by the Corporation. The meter and/or wastewater connection is for the sole use of the Member or customer and is to provide service to only **one (1) dwelling or one (1) business**. Extension of pipe(s) to transfer utility service from one property to another, to share, resell, or submeter water to any other persons, dwellings, businesses, or property, etc., is prohibited.

The Corporation shall have the right to locate a water service meter and the pipe necessary to connect the meter on the Member's property at a point to be chosen by the Corporation, and shall have access to its property and equipment located upon Member's premises at all reasonable and necessary times for any purpose connected with or in the furtherance of its business operations, and upon discontinuance of service the Corporation shall have the right to remove any of its equipment from the Member's property. The Member shall install, at their own expense, any necessary service lines from the Corporation's facilities and equipment to the point of use, including any customer service isolation valves, backflow prevention devices, clean-outs, and other equipment as may be specified by the Corporation. The Corporation shall also have access to the Member's property for the purpose of inspecting for possible cross-connections, potential contamination hazards, illegal lead materials, and any other violations or possible violations of state and federal statutes and regulations relating to the federal Safe Drinking Water Act or Chapter 341 of the Texas Health & Safety Code or and the corporation's tariff and service policies.

The Corporation is responsible for protecting the drinking water supply from contamination or pollution which could result from improper practices. This service agreement serves as notice to each customer of the restrictions which are in place to provide this protection. The Corporation shall enforce these restrictions to ensure the public health and welfare. The following undesirable practices are prohibited by state regulations:

- a. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an airgap or an appropriate backflow prevention assembly in accordance with state regulations.

- b. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the proper installation of an airgap or a reduced pressure-zone backflow prevention assembly and a service agreement must exist for annual inspection and testing by a certified backflow prevention device tester.
- c. No connection which allows condensing, cooling, or industrial process water to be returned to the public drinking water supply is permitted.
- d. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair of any public water supply.
- e. No solder or flux which contains more than 0.2% lead may be used for the installation or repair of any plumbing in a residential or nonresidential facility providing water for human consumption and connected to a public drinking water supply system.

The Corporation shall maintain a copy of this agreement as long as the Member and/or premises is connected to the public water system. The Member shall allow their property to be inspected for possible cross-connections, potential contamination hazards, and illegal lead materials. These inspections shall be conducted by the Corporation or its designated agent prior to initiating service and periodically thereafter. The inspections shall be conducted during the Corporation's normal business hours.

The Corporation shall notify the Member in writing of any cross-connections or other undesirable practices which have been identified during the initial or subsequent inspection. The Member shall immediately correct any undesirable practice on their premises. The Member shall, at their expense, properly install, test, and maintain any backflow prevention device required by the Corporation. **Copies of all testing and maintenance records shall be provided to the Corporation as required. Failure to comply with the terms of this service agreement shall cause the Corporation to either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Member.**

In the event the total water supply is insufficient to meet all of the Members, or in the event there is a shortage of water, the Corporation may initiate the Emergency Rationing Program as specified in the Corporation's Tariff. By execution of this agreement, the Applicant hereby shall comply with the terms of said program.

By execution hereof, the Applicant shall hold the Corporation harmless from any and all claims for damages caused by service interruptions due to waterline breaks by utility or like contractors, tampering by other Member/users of the Corporation, normal failures of the system, or other events beyond the Corporation's control.

The Applicant shall grant to the Corporation permanent recorded easement(s) dedicated to the Corporation for the purpose of providing reasonable rights of access and use to allow the Corporation to construct, maintain, replace, upgrade, parallel, inspect, test and operate any facilities necessary to serve that Applicant as well as the Corporation's purposes in providing system-wide service for existing or future members.

By execution hereof, the Applicant shall guarantee payment of all other rates, fees, and charges due on any account for which said Applicant owns a Membership Certificate. Said guarantee shall pledge any and all Membership Fees against any balance due the Corporation. Liquidation of said Membership Fees shall give rise to discontinuance of service under the terms and conditions of the Corporation's tariff.

By execution hereof, the Applicant agrees that non-compliance with the terms of this agreement by said Applicant shall constitute denial or discontinuance of service until such time as the violation is corrected to the satisfaction of the Corporation.

Any misrepresentation of the facts by the Applicant on any of the pages of this agreement shall result in discontinuance of service pursuant to the terms and conditions of the Corporation's tariff.

RIGHT-OF-WAY EASEMENT
(General Type Easement)

KNOW ALL MEN BY THESE PRESENTS, that _____
(hereinafter called "Grantors"), in consideration of one dollar (\$1.00) and other good and valuable consideration paid by CHALK BLUFF WATER SUPPLY CORPORATION (hereinafter called "Grantee"), the receipt and sufficiency of which is hereby acknowledged, does hereby grant, bargain, sell, transfer, and convey to said Grantee, its successors, and assigns, a perpetual easement with the right to erect, construct, install and lay and thereafter access and use, operate, inspect, repair, maintain, replace, upgrade, parallel and remove water distribution and/or sewer collection lines and appurtenances, over and across _____ acres of land, more particularly described in instrument recorded in Vol. _____, Page _____, Deed Records, _____ County, Texas, together with the right of ingress and egress over Grantor's adjacent lands for the purpose for which the above mentioned rights are granted. The easement hereby granted shall not exceed 15' in width, and Grantee is hereby authorized to designate the course of the easement herein conveyed except that when the pipeline(s) is installed, the easement herein granted shall be limited to a strip of land 15' in width, the center line thereof being the pipeline as installed.

Grantee shall have such other rights and benefits necessary and/or convenient for the full enjoyment and use of the rights herein granted, including without limitation, (1) the reasonable right of ingress and egress over and across lands owned by Grantor which are contiguous to the easement; (2) the reasonable right from time to time to remove any and all paving, undergrowth and other obstructions that may injure Grantee's facilities and appurtenances or interfere with the construction, maintenance, inspection, operation, protection, repair, alteration, testing, replacement, upgrading, relocation (as above limited), substitution or removal thereof; and (3) the rights to abandon-in-place any and all water supply and/or sewer distribution lines, service lines and associated appurtenances, such that Grantee shall have no obligation or liability to Grantor, or their successors or assigns, to move or remove any such abandoned lines or appurtenances.

In the event the easement hereby granted abuts on a public road and the county or state hereafter widens or relocates the public road so as to require the relocation of this water and/or sewer line as installed, Grantor further grants to Grantee an additional easement over and across the land described above for the purpose of laterally relocating said water and/or sewer line as may be necessary to clear the road improvements, which easement hereby granted shall be limited to a strip of land 15' in width, the center line thereof being the pipeline as relocated.

The consideration recited herein shall constitute payment in full for all damages sustained by Grantors by reason of the installation of the structures referred to herein and the Grantee will maintain such easement in a state of good repair and efficiency so that no unreasonable damages will result from its use to Grantor's premises. This Agreement together with other provisions of this grant shall constitute a covenant running with the land for the benefit of the Grantee, its successors, and assigns. The Grantors covenant that they are the owners of the above described lands and that said lands are free and clear of all encumbrances and liens except the following:

Grantor does hereby bind itself, its successors and assigns, to WARRANT AND FOREVER DEFEND, all and singular, the easement herein granted to Grantee, or Grantee's successors and assigns, against every person whomsoever claiming, or to claim, the same or any part thereof.

The easement conveyed herein was obtained or improved through Federal financial assistance. This easement is subject to the provisions of Title VI of the Civil Rights Act of 1964 and the regulations issued pursuant thereto for so long as the easement continues to be used for the same or similar purpose for which financial assistance was extended or for so long as the Grantee owns it, whichever is longer.

IN WITNESS WHEREOF the said Grantors have executed this instrument this _____ day of _____, 20____

Notary Public, State of Texas

Texas Commission on Environmental Quality
Form TCEQ-20700 - Instructions

General Instructions:

The purpose of form TCEQ-20700 Backflow Prevention Assembly Test and Maintenance Report (T&M Form) is to document the results of testing a backflow prevention assembly. The form can be completed in one of two ways:

1. The form can be printed and completed by hand, or
2. The form can be completed electronically through an electronic medium (tablet, laptop computer, etc.). The yellow areas on the form can be completed electronically.

NOTE: The form is intended to be completed on-site while testing is occurring. If the form is completed electronically, the electronic device must also be on-site for proper use of this form.

The form must be printed and signed by the Licensed Tester that performed the work, unless TCEQ approved electronic recording keeping is in use. The hardcopy original must be provided to the Public Water System (PWS) as specified in *Title 30 of the Texas Administrative Code 290.44(h)(4)(c)*.

Specific Instructions:

Please follow the instructions below when completing form TCEQ-20700:

1. Check boxes: If completing the form electronically, all check boxes can be selected to make the desired indication. Selecting a box will insert an "X" in the box.
2. When performing the test, if the "Initial Test" yields acceptable results, do not complete the "Repairs and Materials Used**" or "Test After Repairs" rows on the form.
3. Remarks: If completing the form electronically, the "Remarks" section of the form is expandable, which means the final report can be more than one page. All pages of the T&M Report must be submitted to the water system.
4. Testing completed by a licensed tester must be documented on one form. Any follow-up testing performed by a different tester must be documented on a separate form.

Things to remember:

1. Differential pressure gauges:
 - a. In order to prevent contamination, gauges used on potable water backflow prevention assemblies must **not** be used to test non-potable backflow prevention assemblies.
 - b. Gauges need to be tested for accuracy annually and that date plus the serial number and other gauge information must be correctly recorded on the form. This allows Public water systems to ensure that the gauges are in compliance.
2. Annual testing of backflow prevention assemblies (those installed to protect against health hazards) or differential pressure gauges is to occur no more than 12 months from the last test date.
3. A tester's license is based on the testing procedures described in the University of Southern California's 10th edition manual. These procedures are expected to be used when testing backflow prevention assemblies.
4. Type II assemblies: This form can only accommodate a Type II assembly with a single check bypass.

Texas Commission on Environmental Quality
